

Xtreme Fuel Treatment™

Xtreme Fuel Treatment™ is a product patented and time tested for nearly two decades in industrial markets around the world. Extensive testing and performance measurement data prove that it really works! Now, for the first time ever, Xtreme Fuel Treatment™ is available to the general public for use in all types of engines.

Four Key Benefits

Xtreme Fuel Treatment™ is a break-through product which produces results in four key categories:

1. Increases Fuel Mileage:

Reduces fuel consumption resulting in increased miles per gallon.

2. Prolongs Engine Life & Reduces Engine Wear:

A cleaner and more lubricated engine means longer engine life and reduced wear.

3. Improves Vehicle Performance & Horsepower:

Burns more of the available BTU's in the fuel resulting in better performance.

4. Reduces Harmful Emissions & Pollutants:

Reducing harmful pollutants from the exhaust pipe results in a cleaner environment.

Uses

Use Xtreme Fuel Treatment™ in all of your gasoline and diesel engines, both two and four cycle including:

- Cars
- Pickups
- Heavy Trucks
- Buses
- Yard Equipment
- Motorcycles
- Snowmobiles
- ATVs
- Boats
- RV's
- Generators
- Farm Equipment
- Construction Equipment

Ingredients & Benefits

Xtreme Fuel Treatment's™ unique formula contains multiple ingredients, each designed for a specific purpose which increases fuel mileage and economy, prolongs engine life, decreases wear, and reduces harmful emissions and pollutants.

Combustion Catalyst –

Extends the burn rate of fuel during combustion to provide a more complete fuel burn resulting in increased gas mileage, fewer harmful emissions and less carbon buildup on engine parts.

Fuel Stabilizers – Prolongs the life of stored fuel; ideal for seldom used equipment.

Polymerization Retardant and Dispersants – Reduces sludge buildup in fuel which can plug filters.

Detergents – Removes harmful deposits from fuel pumps, injectors and throughout the fuel system.

Rust and Corrosion Inhibitors –

Prevents tank and fuel system corrosion caused by oxidation and condensation.

Demulsifiers – Helps separate water from fuel.

Just a quarter ounce of Xtreme Fuel Treatment™ (in a 20 gallon tank) provides the most comprehensive fuel treatment available and allows the use of lower octane gasoline with no decrease in engine performance.

For you to enjoy the full benefits listed above without using Xtreme Fuel Treatment™, you would have to buy the highest grade premium fuel available, spending 20 to 30 cents more per gallon, as well as multiple individual additives.

Dosage

First three treatments with Xtreme Fuel Treatment™ =
1/2 oz. up to 20 gallons of fuel

Subsequent treatments = 1/4 oz. up to 20 gallons of fuel

It is best to add Xtreme Fuel Treatment™ prior to dispensing fuel, however XFT™ is safe to add to your vehicle at any time. Simply estimate the amount of fuel in your tank and treat accordingly.
